Choudhary Senior Secondary School, Jaipur

Secondary   Jul 2008 - May 2009
Shree Kumawat Kshatriya Public School, Jaipur

EMPLOYMENT

Sep 2022 - Present

Aarrsol digital private limited, Jaipur
As a Developer, I initially worked with PHP for the backend and Vue.js for the frontend on a game project. However, as the project evolved, I transitioned to using Node.js for the backend development, while also upgrading the frontend to Vue 3 for improved performance and features. This shift allowed me to leverage Node.js's capabilities for handling real-time data and scaling the application effectively, while Vue 3 provided enhanced tools for building dynamic and responsive user interfaces.

1. **Node project :-**
   - **victoryexch** :- Casino Game like teen pati , Poker
   - **Virtual Sports** : - victual event mention in this project
   - **Sports radar** : Sport related Game
